

CONTENTS

(based on prevalent subjects)

Breeding, genetics and reproduction

- Effect of egg weight on ostrich (*Struthio camelus*) chick weight and growth 7
- Analysis of single nucleotide polymorphisms in major and candidate genes for production traits in Nero Siciliano pig breed 19
- Effect of the proportion of Duroc genes in crosses with Large White and Landrace pigs on the characteristics of seasoned Parma ham 31
- Demographic characterization and genetic variability of the Girgentana goat breed by the analysis of genealogical data 41
- A new approach in association study of single nucleotide polymorphism of genes for carcass and meat quality traits in commercial pigs 177
- Genetic variability of meat quality traits in Chianina beef cattle 191
- *MwoI* and *SmaI* RFLPs polymorphisms of porcine obese gene and their association with carcass and meat characteristics of heavy pigs 211
- Relationship between serum β -lactoglobulin content during gestation and reproductive efficiency in primiparous sows 219
- Milk of Italian Saddle and Haflinger nursing mares: physico-chemical characteristics, nitrogen composition and mineral elements at the end of lactation (short communication) 293
- The production of the heavy pig for high quality processed products (review article) 309
- Use of linear discriminant analysis to characterise three dairy cattle breeds on the basis of several milk characteristics 377
- Functional characterisation of semen in honeybee queen (*A.m.ligustica* S.) spermatheca and efficiency of the diluted semen technique in instrumental insemination 385

Ruminant nutrition, production, growth and development

- Effect of non-structural carbohydrate dietary content on the productive performance of Sarda primiparous ewes 61
- Effect of type of suckling and polyunsaturated fatty acid use on lamb production.
1. Productive performances and quanti-qualitative characteristics of the carcass 71
- Effect of type of suckling and polyunsaturated fatty acid use on lamb production.
2. Chemical and fatty acid composition of raw and cooked meat 81
- Safety assessment and feeding value for pigs, poultry and ruminant animals of pest protected (Bt) plants and herbicide tolerant (glyphosate, glufosinate) plants: interpretation of experimental results observed worldwide on GM plants (review article) 107
- Investigation of different levels of RDP in the rations of lactating cows and their effects on MUN, BUN and urinary N excretion 157

CONTENTS

(based on prevalent subjects)

• Differences between primiparous and multiparous cows in voluntary milking frequency in an automatic milking system	167
• Feeding dairy cows with full fat extruded or toasted soybean seeds as replacement of soybean meal and effects on milk yield, fatty acid profile and CLA content	243
• Effect of ageing time on consumer-perceived quality of Italian Simmental beef	259
• Meat quality traits of <i>longissimus thoracis</i> , <i>semitendinosus</i> and <i>triceps brachii</i> muscles from Chianina beef cattle slaughtered at two different ages	267
• Influence of housing conditions and calving distance on blood metabolites in water buffalo cows	275
• The levels of glutathione and hemoglobin in sheep erythrocytes as a function of age (short communication)	283
• Effects of olive oil calcium soaps and phase of lactation on the fatty acid composition in the milk of Massese ewes	353
• Use of linear discriminant analysis to characterise three dairy cattle breeds on the basis of several milk characteristics	377

Non-ruminant nutrition, production, growth and development

• Effect of egg weight on ostrich (<i>Struthio camelus</i>) chick weight and growth	7
• Analysis of single nucleotide polymorphisms in major and candidate genes for production traits in Nero Siciliano pig breed	19
• Safety assessment and feeding value for pigs, poultry and ruminant animals of pest protected (Bt) plants and herbicide tolerant (glyphosate, glufosinate) plants: interpretation of experimental results observed worldwide on GM plants (review article)	107
• Discrimination of origin of farmed trout by means of biometrical parameters, fillet composition and flavor volatile compounds	123
• Effect of dietary polyunsaturated fatty acids and vitamin E on serum oxidative status in horses performing very light exercise	141
• A new approach in association study of single nucleotide polymorphism of genes for carcass and meat quality traits in commercial pigs	177
• <i>Mwo</i> I and <i>Sma</i> I RFLPs polymorphisms of porcine obese gene and their association with carcass and meat characteristics of heavy pigs	211
• Relationship between serum β -lactoglobulin content during gestation and reproductive efficiency in primiparous sows	219
• The effects of Sepiolite-SPLF on piglet and heavy pig production	225
• Growth response and body composition of sharpnose sea bream (<i>Diplodus puntazzo</i>) fed a high energy diet with different protein levels	235

CONTENTS

(based on prevalent subjects)

- Avian Pneumovirus infection in turkey and broiler farms in Italy:
a virological, molecular and serological field survey (short communication) 287
- Milk of Italian Saddle and Haflinger nursing mares:
physico-chemical characteristics, nitrogen composition and mineral elements
at the end of lactation (short communication) 293
- The production of the heavy pig for high quality processed products (review article) 309
- Effect of bacterial protein meal grown on natural gas on growth performance
and carcass traits of pigs 323
- Effects of sugar beet pulp on growth and health status of weaned piglets 337
- Effects of rearing density on rainbow trout welfare, determined by plasmatic
and tissue parameters 393

Feed science, by-products and feed technology

- Safety assessment and feeding value for pigs, poultry and ruminant animals
of pest protected (Bt) plants and herbicide tolerant (glyphosate, glufosinate) plants:
interpretation of experimental results observed worldwide on GM plants (review article) 107
- Investigation of different levels of RDP in the rations of lactating cows
and their effects on MUN, BUN and urinary N excretion 157
- The effects of Sepiolite-SPLF on piglet and heavy pig production 225
- Feeding dairy cows with full fat extruded or toasted soybean seeds as replacement
of soybean meal and effects on milk yield, fatty acid profile and CLA content 243
- Effect of bacterial protein meal grown on natural gas on growth performance
and carcass traits of pigs 323
- Effects of sugar beet pulp on growth and health status of weaned piglets 337
- Effects of olive oil calcium soaps and phase of lactation on the fatty acid composition
in the milk of Massese ewes 353
- Quality evaluation of regional forage resources by means
of near infrared reflectance spectroscopy 363

Behaviour, welfare and management

- Effect of type of suckling and polyunsaturated fatty acid use on lamb production.
1. Productive performances and quanti-qualitative characteristics of the carcass 71
- Effect of type of suckling and polyunsaturated fatty acid use on lamb production.
2. Chemical and fatty acid composition of raw and cooked meat 81
- Discrimination of origin of farmed trout by means of biometrical parameters,
fillet composition and flavor volatile compounds 123

CONTENTS

(based on prevalent subjects)

- Effect of dietary polyunsaturated fatty acids and vitamin E on serum oxidative status in horses performing very light exercise 141
- Differences between primiparous and multiparous cows in voluntary milking frequency in an automatic milking system 167
- Influence of housing conditions and calving distance on blood metabolites in water buffalo cows 275
- The levels of glutathione and hemoglobin in sheep erythrocytes as a function of age (short communication) 283
- Effects of rearing density on rainbow trout welfare, determined by plasmatic and tissue parameters 393

Hygiene and health

- Occurrence of enterotoxin genes and macrorestriction analysis of *Staphylococcus aureus* isolated from bovine mastitis and bulk-tank milk samples in Italy. An epidemiological study 47
- Safety assessment and feeding value for pigs, poultry and ruminant animals of pest protected (Bt) plants and herbicide tolerant (glyphosate, glufosinate) plants: interpretation of experimental results observed worldwide on GM plants (review article) 107
- Effect of dietary polyunsaturated fatty acids and vitamin E on serum oxidative status in horses performing very light exercise 141
- Effect of somatic cell count and lactation stage on sheep milk quality 147
- Differences between primiparous and multiparous cows in voluntary milking frequency in an automatic milking system 167
- The effects of Sepiolite-SPLF on piglet and heavy pig production 225
- Influence of housing conditions and calving distance on blood metabolites in water buffalo cows 275
- Avian Pneumovirus infection in turkey and broiler farms in Italy: a virological, molecular and serological field survey (short communication) 287
- Effects of sugar beet pulp on growth and health status of weaned piglets 337
- Effects of olive oil calcium soaps and phase of lactation on the fatty acid composition in the milk of Massese ewes 353

Meat science and technology

- Effect of the proportion of Duroc genes in crosses with Large White and Landrace pigs on the characteristics of seasoned Parma ham 31

CONTENTS

(based on prevalent subjects)

- Effect of type of suckling and polyunsaturated fatty acid use on lamb production.
1. Productive performances and quanti-qualitative characteristics of the carcass 71
- Effect of type of suckling and polyunsaturated fatty acid use on lamb production.
2. Chemical and fatty acid composition of raw and cooked meat 81
- Discrimination of origin of farmed trout by means of biometrical parameters,
fillet composition and flavor volatile compounds 123
- A new approach in association study of single nucleotide polymorphism of genes
for carcass and meat quality traits in commercial pigs 177
- Genetic variability of meat quality traits in Chianina beef cattle 191
- *Mwo*I and *Sma*I RFLPs polymorphisms of porcine obese gene and their association
with carcass and meat characteristics of heavy pigs 211
- The effects of Sepiolite-SPLF on piglet and heavy pig production 225
- Growth response and body composition of sharpnose sea bream (*Diplodus puntazzo*)
fed a high energy diet with different protein levels 235
- Effect of ageing time on consumer-perceived quality of Italian Simmental beef 259
- Meat quality traits of *longissimus thoracis*, *semitendinosus* and *triceps brachii* muscles
from Chianina beef cattle slaughtered at two different ages 267

- Effect of bacterial protein meal grown on natural gas on growth performance
and carcass traits of pigs 323

Dairy science and technology

- Occurrence of enterotoxin genes and macrorestriction analysis of *Staphylococcus aureus*
isolated from bovine mastitis and bulk-tank milk samples in Italy.
An epidemiological study 47
- Morphometric analysis of fat globules in ewe's milk and correlation
with qualitative parameters 55
- Effect of non-structural carbohydrate dietary content on the productive performance
of Sarda primiparous ewes 61
- Effect of somatic cell count and lactation stage on sheep milk quality 147
- Investigation of different levels of RDP in the rations of lactating cows
and their effects on MUN, BUN and urinary N excretion 157
- Differences between primiparous and multiparous cows in voluntary milking frequency
in an automatic milking system 167
- Feeding dairy cows with full fat extruded or toasted soybean seeds
as replacement of soybean meal and effects on milk yield, fatty acid profile
and CLA content 243

CONTENTS

(based on prevalent subjects)

- Influence of housing conditions and calving distance on blood metabolites in water buffalo cows 275
- Milk of Italian Saddle and Haflinger nursing mares: physico-chemical characteristics, nitrogen composition and mineral elements at the end of lactation (short communication) 293
